

OpenCL.org internship/externship

Our internship is according the description: it's a rather complex homepage which should look good on your CV (if you manage to build it).

Want to help build an important website? OpenCL.org's components have been designed and partly built, but still a lot of work needs to be done. We're seeking an intern (or "extern" when not in Amsterdam) who can help us build the site. **This internship is not about GPUs!**

To complete the tasks, the following is required:

Technical expertise:

- HTML5, CSS
- PHP
- Javascript
- jQuery
- Node.js
- Mediawiki
- XSLT

- Can-do mentality
- Able to plan own work
- Good communication-skills
- Available for 3 to 6 months

We don't expect you know all tools, so we will guide you in learning new tools and techniques. Write us a "email of interest" to info@streamhpc.com, and write what you can and what your objectives for an internship would be.

We're looking forward to see your letter!
