

## Training

# Public trainings in Amsterdam

As Amsterdam is easy to reach from anywhere in Europe, we're giving most of our public trainings in our offices. See the below list what is upcoming:

No events

## In-company trainings globally

We at StreamHPC train IT-experts in OpenCL, CUDA and GPU directives world-wide. All trainings can be given in English or Dutch; on request printed materials can be translated into your local language.

We offer:

- crash courses in GPUs, FPGAs and directives,
- in-dept trainings, and
- in-house trainings.

## What customers said

"Normally you just get told to type in specific commands in some order, which you can find in the text books too. StreamHPC focused on teaching the backgrounds to get a mindset for GPU-programming and to better understand the hardware. After that I understood the SDK-examples much better."
